

Home

I think this home shows a person who loves flowers. Like my mother; she loves flowers. I remember her when she was planting flowers, she looked very happy. This garden makes me remember my mother; she has a lot of different flowers around her house. I think people who love flowers have many paintings and vases with flowers inside their houses. I'd like to live in a house like this but with the most beautiful multi-colored flowers from other foreign countries. I like the foliage of some of the plants, because they look like flowers and they look gorgeous. I especially like the thatched roof of the house; it makes the roof of the house look special.

ROCIO GALLEGOS
