Assessment Climate at Isothermal Community College

I most often think of assessment as providing:

19%	66%	15%
Program feedback to the instructors	Some of both	Individual feedback to the learners

My attitude toward the necessity of program assessment:

70%	28%	2%
Professionals assess as part of continuous improvement efforts	Some of both	“They” are making us do this

My attitude about usefulness of program assessment:

64%	34%	2%
Assessment provides useful information to improve programs	Some of both	It’s another useless paperwork exercise

My feelings about the use of program assessment results:

72%	28%	0%
We have the power to use these results to improve our programs and courses	Some of both	It will surely be used against us
