

Isothermal Community College Vaccination Status Form

Student Name: _____ Student ID#: _____

Student Address: _____

Student Phone Number: _____ Student Email Address: _____

Program of Study: _____

Vaccination Status (check one of the following):

_____ I am **fully vaccinated** – I have received all required vaccines. (Documentation of vaccination must accompany this form.)

_____ I am **requesting a Medical Exemption**. (Documentation from your primary care provider must accompany this form upon submission.)

_____ I am **requesting a Religious Exemption**. (By checking this option, I am attesting that receipt of vaccination and immunization would conflict with my sincere religious beliefs.)

Additionally, by submitting this signed Vaccination Status Form, I confirm all of the information I have provided above is true and I understand and accept the following conditions:

1. While Isothermal Community College may grant medical or religious exemptions to the vaccination requirement, clinical partners may not be willing to accept or abide by those exemptions. In such cases, a student may be unable to complete the clinical portion of their course requirements and thus unable to successfully complete the courses and/or programs. The Student may request an alternate clinical placement and in these situations, the College will try to accommodate the student, but cannot guarantee an alternate placement assignment as other clinical sites may not be available.
2. If a clinical partner does accept a medical or religious exemption to Isothermal's vaccination requirement, the clinical partner may impose additional requirements on the student in order to allow participation at the clinical site. In that case, a student with an exemption is solely responsible for meeting those additional requirements (e.g. additional PPE, regular COVID testing). If the requirements are not met, students may be unable to complete the clinical portion of their course requirements and thus unable to successfully complete courses and/or programs.
3. Students are not able refuse clinical assignments due to vaccination status. If a student is unwilling to accept a clinical assignment based on vaccination status, the student will be unable to complete the clinical portion of their course requirements and thus unable to successfully complete courses and/or programs.
4. Employers may require graduates to obtain required vaccinations in order to obtain gainful employment. A waiver of Isothermal's Vaccination Requirement does not indicate that any student will be eligible and/or able to find employment within their respective field after graduation.
